
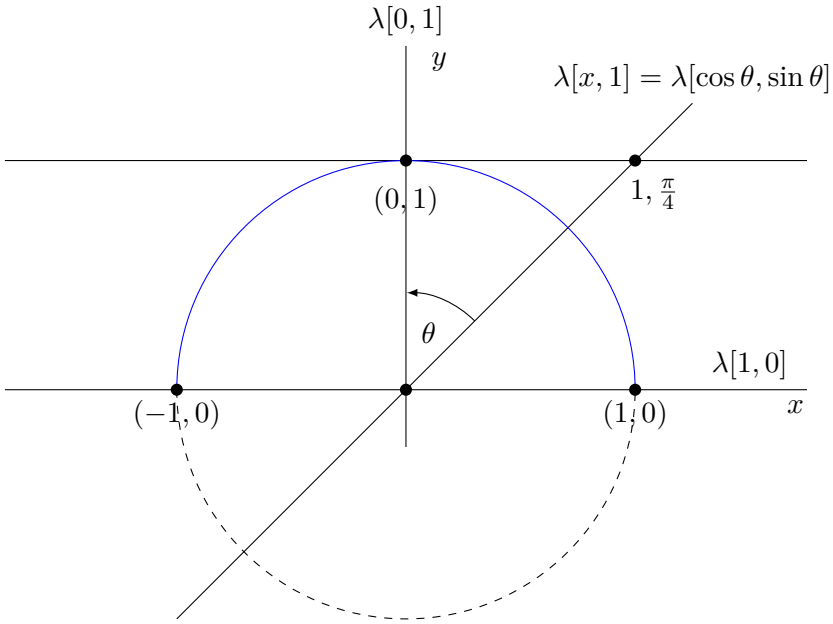

Figure 1: Real Projective Line Setup

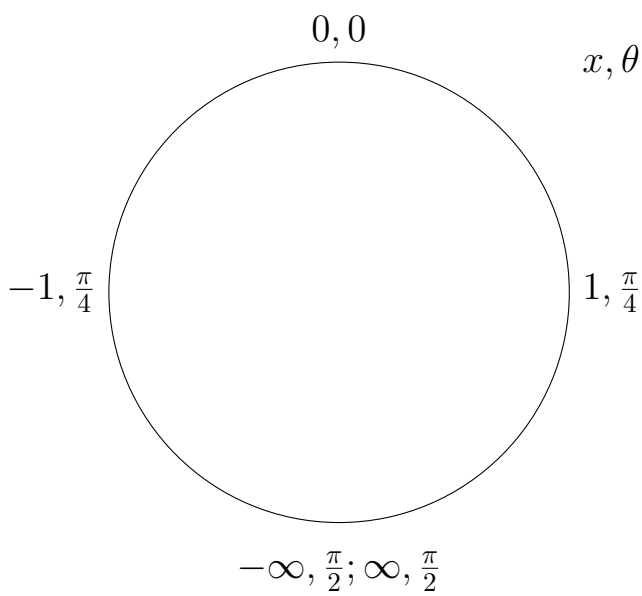

Figure 2: The Real Projective Line is a Circle

What	Linear Algebra	Fourier Series
Vector Space	$\mathbb{R}^n$	Piecewise smooth 2π-periodic functions on $\mathbb{R}$
Inner Product	$\langle \mathbf{u}, \mathbf{v} \rangle = \sum_{i=1}^{n} u_i v_i$	$\langle f(t), g(t) \rangle = \frac{1}{\pi} \int_{-\pi}^{\pi} f(t) g(t)\, dt$
Orthonormal Basis $\left(\mathbb{R}^3\right)$	$\{(1,0,0),(0,1,0),(0,0,1)\}$	$\{1, \cos mt, \sin nt\},\ n, m \in \mathbb{N} \backslash \{0\}$
Representation of a Vector in the Basis	$\mathbf{x} = \sum_{i=1}^{n} a_i \mathbf{e}_i$	$f(x) = \frac{a_0}{2} + \sum_{n=1}^{\infty} a_n \cos nt + \sum_{n=1}^{\infty} b_n \sin nt$
Coefficients are Projections	$a_i = \langle \mathbf{x}, \mathbf{e}_i \rangle$	$a_0 = \langle f(t), 1 \rangle$ $a_m = \langle f(t), \cos mt \rangle$ $b_m = \langle f(t), \sin mt \rangle$

Table 1: Vector Spaces: Linear Algebra vs. Fourier Series

Note: Some people think that the orthonormal basis for the Fourier series should be $\{\mathbf{1}, \sqrt{2}\cos mt, \sqrt{2}\sin nt\}$, since

$$\langle \mathbf{1}, \mathbf{1} \rangle = \frac{1}{\pi} \int_{-\pi}^{\pi} \mathbf{1}^2\, dt = \frac{1}{\pi} \int_{-\pi}^{\pi} dt = \frac{1}{\pi}\, t \Big|_{-\pi}^{\pi} = \frac{1}{\pi}\left(\pi - (-\pi)\right) = \frac{1}{\pi} 2\pi = 2$$

OTOH, $\langle \cos nt, \cos nt \rangle = \frac{1}{\pi} \int_{-\pi}^{\pi} \cos^2 nt\, dt = \frac{1}{\pi}\pi = 1$. In the same way, $\langle \sin nt, \sin nt \rangle = 1$.

One of the points here (or perhaps, the point here) is that $\langle \hat{\mathbf{u}}, \hat{\mathbf{u}} \rangle = 1$ for all unit vectors $\hat{\mathbf{u}}$, so what about $\langle \mathbf{1}, \mathbf{1} \rangle$ if $\mathbf{1}$ is part of an orthonormal basis (again, since $\langle \mathbf{1}, \mathbf{1} \rangle = 2$)?

Note also that here $\langle \mathbf{1}, \sin nt \rangle = \frac{1}{\pi} \int_{-\pi}^{\pi} \mathbf{1} \sin nt\, dt = \frac{1}{\pi} \int_{-\pi}^{\pi} \sin nt\, dt = 0$. Similarly, $\langle \mathbf{1}, \cos nt \rangle = \langle \cos nt, \sin mt \rangle = 0$.
